Software engineer specializing in web development, passionate about creating efficient, user-friendly and scalable web applications. Highly motivated, with a mastery of front-end and back-end technologies, including HTML, CSS, JavaScript, as well as frameworks like React and Symfony. Demonstrated ability to collaborate in teams, solve complex technical problems, and learn continuously while adapting to new tools and technologies. Attentive to detail, autonomous and committed to producing clean, maintainable code while meeting project deadlines. Eager to contribute to innovative projects and grow professionally in the dynamic field of web development.

Experiences

APRIL 2025 – Now

Backend Developer | Maki Office | Ambatoroka, Antananarivo

As a backend developer at Maki Office, I am responsible for implementing the technical solutions necessary for the creation and development of the company's web platforms. I analyze requirements, design server architecture, and develop backend features, while ensuring the performance, security, and reliability of the systems.

FEBRUARY 2024 – FEBRUARY 2025

Service provider | Banky Foiben'i Madagasikara | Antaninarenina, Antananarivo

As a service provider for Banky Foiben'i Madagasikara, I played a key role in modernizing the company's technical infrastructure. My main project was the upgrade of the Symfony framework used by the intranet platform (from version 3.4 to version 6.4), ensuring better system performance, security and maintainability. At the same time, I also contributed to the development of an innovative web application, again using Symfony, designed to meet the company's specific needs and improve the efficiency of its internal processes.

JULY 2023 – OCTOBER 2023

IT Intern | BAKANTIMO | Antananarivo

During my internship, which was instrumental in helping me obtain my Master's degree in Computer Science and Engineering, I worked on a variety of rewarding projects. My main project was the design and implementation of a web-based task and team management application, developed with Node.js and Express, to meet the company's operational needs. At the same time, I contributed to the development of a mobile game, where my main mission was to create a mini-game using C# and Unity.

MARCH 2021 – MAY 2021

IT Intern | Ministry of National Education | Antananarivo

During my internship, which enabled me to obtain my bachelor's degree in computer science, I carried out a project involving the design and implementation of a web-based videoconferencing system. The project was carried out using the WebRTC module for real-time communications management, and Node.js and Express.js for backend development.

Competences

➤ **Programming languages:**

JavaScript, PHP, C#, HTML, CSS

➤ **Technologies and tools**

Node.js, ReactJS, Symfony, Express.js, WebRTC, Unity

➤ **Database management system**

MySQL, ORACLE

➤ **Design methodology**

MERISE, 2TUP

➤ **Project management**

Agile

➤ **Languages**

Malagasy • Francais • Anglais

Educations

2022 - 2023

Master II & Computer Engineer | École Nationale d'Informatique | Fianarantsoa

2nd year of Master's degree in General Computer Science • Graduation

2021 - 2022

Master I in Computer Science | École Nationale d'Informatique | Fianarantsoa

1st year of Master in General Computer Science

2020 - 2021

Licence III in Computer Science | École Nationale d'Informatique | Fianarantsoa

3rd year of Bachelor's degree in General Computer Science • Graduation

2019 - 2020

Licence II in Computer Science | École Nationale d'Informatique | Fianarantsoa

2nd year of Bachelor's degree in General Computer Science

2018 - 2019

Licence I in Computer Science | École Nationale d'Informatique | Fianarantsoa

1st year of Bachelor's degree in General Computer Science
